

Almond Technology Xchange (ATX) is a Texas-based company with offices in Nashville, Tennessee that provides businesses with cutting-edge IT solutions, including AI readiness assessments, custom cybersecurity strategies, and telecom expense management to drive growth, security, and innovation. ATX offers services like evaluating data infrastructure for AI integration, performing CyberHealth audits to identify vulnerabilities, and managing telecom expenses through partnerships with over 160 carriers for voice, internet, and data center services.

Key Services

- **AI Readiness Assessment:**

ATX evaluates your current data infrastructure to create a roadmap for integrating AI, building AI-assisted systems like generative chatbots.

- **CyberHealth Audit & Cybersecurity Framework:**

The company conducts security audits to find vulnerabilities and provides customized cybersecurity strategies, covering compliance, detection, and defense.

- **Telecom Expense Management & Network Sourcing:**

ATX offers services to reduce telecom costs by sourcing voice, collaboration, internet, and data center services from various carriers.

Company Location and Mission

- **Location:** Almond Technology Xchange is based in New Braunfels, Texas.
- **Mission:** ATX aims to provide a comprehensive, one-stop-shop experience for businesses seeking to enhance their digital transformation through secure and innovative technological solutions.
